Community Profile

Rockville is one of the largest cities in Maryland, located approximately 12 miles northwest of Washington, DC. Named a Green Power Community in 2011, Rockville was the second community in the state to join the program. Committed to being a leader in sustainability, Rockville purchases wind Renewable Energy Certificates (RECs) for 100 percent of the electricity used by Rockville's municipal buildings, City utility systems and streetlights. The City is proud of the community's collective contribution to purchasing green power and promoting environmental sustainability, energy innovation and a reduction in carbon emissions.

Partners Contributing to Community Effort

- 121 Associates Limited Partnership
- Black Restaurant Group
- City of Rockville, MD
- Congressional North Associates Limited Partnership
- Congressional Village Associates, LLC
- Dawson's Market
- Goodwill Industries International / Headquarters
- Grosvenor Market
- Montgomery County Clean Energy Buyers Group
- The Tower Companies

EPA Summary for the City of Rockville (100% Green Power for Municipal Electricity)
